

Emergency planet !

Nowadays, the planet is in danger. Indeed, rivers and seas are polluted by plastic wastes which create the 7th continent. Furthermore, we over package everything which contributes at the pollution of our Earth.

<https://news.un.org/en/story/2018/06/1011671>

So, we shouldn't, to protect and saved the world, use disposable nappies and over packaged product

The Nuclear waste is also a serious problem and we continue the same way without worrying about the ground who welcomes us

<https://www.scimex.org/newsfeed/nuclear-shutdowns-increased-air-pollution>

So, we should use green energies and purchase energy-efficient appliance to use less energy

There are too many wastes in the rubbish and sometimes in the environment

<https://recyclenation.com/2014/09/recycling-glass-does-color-matter/>

<http://monjardin.fond-ecran-image.com/blog-photo/le-composteur-dans-mon-jardin-simple-economique-et-bien-pratique/>

So, we should recycled waste like glass bottles as well as compost the carrot top or the onion skins. We should also keep wastes and throw them in the bin when we can

Paper is made from trees and the Rainforest is destroyed to plant new trees for palm oil

Let's save the planet before it's too late...

<https://bitrebels.com/lifestyle/poor-little-trees-cut-down-forest-trees-with-sad-faces/>

Save and protect us please ! Think about your acts humans !

We, animals and humans, need trees to survive !

Let's save the planet before it's too late...
